

MOHAMMED ZAHEER

AI Engineering Student | Python & Machine Learning

Mangalore, India | +91 87621 78158 | mohammedzaheer76685@gmail.com | linkedin.com/in/mohammed-zaheer

PROFESSIONAL SUMMARY

AI Engineering student (2023–2027) with an Artificial Intelligence & Data Science background and hands-on experience building academic projects in machine learning, cloud security, and blockchain, including a cloud intrusion detection system and a product authenticity verification platform. Skilled in Python, SQL, and Power BI, with a strong interest in applying data-driven and AI-based approaches to solve real-world problems. Seeking an entry-level Software Engineering or Data Analytics role to contribute technical skills and continue growing as an AI/software professional.

TECHNICAL SKILLS

Languages: Python, C, SQL

Data & Visualization: Power BI, SQL, Data Analytics, Data Interpretation

Concepts: Machine Learning, Artificial Intelligence, Data Analytics

Domains: Cloud Security, Cybersecurity, Blockchain Technology

Soft Skills: Problem Solving, Analytical Thinking, Communication, Teamwork, Adaptability, Time Management

RELEVANT COURSEWORK

Data Structures, Database Management Systems, Operating Systems, Computer Networks

PROJECTS

AI-Powered Cloud Intrusion Detection and Threat Mitigation System

- Objective: Detect malicious activity in cloud environments and automate threat response.
- Technologies: Python, Machine Learning concepts.
- Built an AI-based system in Python to identify malicious activity patterns in cloud environments.
- Designed automated alert generation for detected threats to support faster response.
- Applied machine learning concepts to strengthen cloud security monitoring and detection accuracy.

Product Authenticity Verification Platform (Machine Learning + Blockchain)

- Objective: Verify product authenticity and improve traceability using ML and blockchain.
- Technologies: Python, Machine Learning, Blockchain.
- Built a machine learning-based product authenticity platform integrating blockchain for tamper-proof verification.
- Designed a secure product validation workflow to improve traceability and counterfeit detection.
- Created tamper-proof, traceable product records to enhance transparency and trust.

CERTIFICATIONS & WORKSHOPS

- Web Development Workshop — Dept. of AI & Data Science, BIT, in association with NxtGen Dev and BIT-ADVA (Apr 2025)
- One-Day Workshop on Virtual Labs — IIT Delhi Virtual Labs Initiative, Bearys Institute of Technology (May 2024)
- Student Induction Programme — Bearys Institute of Technology (2023–2024)

EDUCATION

Bachelor of Engineering, AI Engineering

Bearys Institute of Technology, Mangalore | 2023 – 2027 | CGPA: 7.53

12th (PUC) — Government Junior College, Belur Road, Chikkamagaluru | Percentage: 67.8%

10th — Vidyabharathi English High School | Percentage: 66.08%

LANGUAGES

English, Kannada, Hindi, Urdu

HOBBIES

Book Reading, Swimming, Fitness
